How Do I Flush My DNS Cache on Windows?

Article Number: 10 | Rating: Unrated | Last Updated: Fri, Sep 4, 2020 at 5:05 PM

1. WinXP: Start, Run and then type “cmd” and press Enter.
2. Vista, Window **7** and **Windows** 8: Click “Start” and type the word “Command” in the Start search field. ...
3. In the open prompt, type “**ipconfig** /**flushdns**” (without the quotes).
4. You should receive a message of your success as confirmation when the**cache** is cleared
