# "End of script output before headers" in Apache + PHP

Article Number: 107 | Rating: Unrated | Last Updated: Sun, Feb 27, 2022 at 8:51 PM

The issue was that the request was timing out before the script completed, due to a long-running database query.

So that generic `End of script output before headers` error can be caused by server timeouts as well as file permissions issues.
