Windows VPN route selective traffic by destination network

Article Number: 119 | Rating: Unrated | Last Updated: Tue, Dec 27, 2022 at 5:58 PM

route print

route -p add {network} mask {subnet mask} {gateway}

route delete {network} mask {subnet mask} {gateway}

==========

Sample:

route -p add 192.168.0.12 mask 255.255.255.255 10.100.100.254

route delete 192.168.0.12 mask 255.255.255.255 10.100.100.254
