Tell yum to ignore a single dependency - nodeps

Article Number: 123 | Rating: Unrated | Last Updated: Thu, Feb 2, 2023 at 2:21 AM

Generally `yum` doesn't have options to ignore a single package from the dependencies. Option `--skip-broken` ignores all unresolved dependences.

You can try `yum --exclude=packagename` but it excludes a specific package by name or glob from updates on all repositories, not from dependencies.

```
rpm -Uvh --nodeps $(repoquery --location winswitch)
```
