Hide X-Powered-By: PHP

Article Number: 24 | Rating: Unrated | Last Updated: Tue, Sep 15, 2020 at 4:19 AM

As so much in our beautiful world of IT it's very easy:

1. Open your php.ini in the editor of your trust.
2. Find this line:

```
; Decides whether PHP may expose the fact that it is installed on the server
; (e.g. by adding its signature to the Web server header).  It is no security
; threat in any way, but it makes it possible to determine whether you use PHP
; on your server or not.
expose_php = On
```

3. Change the *On* to an *Off*:

```
expose_php = Off
```

4. Reload your Apache and the *X-Powered-By: PHP* header is gone.
