Get The Current Domain Name With Javascript (Not the path, etc.)

Article Number: 45 | Rating: Unrated | Last Updated: Fri, Oct 2, 2020 at 9:16 AM

If you wish a full domain origin, you can use this:

```
document.location.origin
```

And if you wish to get only the domain, use can you just this:

```
document.location.hostname
```

But you have other options, take a look at the properties in:

```
document.location
