How do you define a PHP include as a string?

Article Number: 49 | Rating: Unrated | Last Updated: Sun, Oct 4, 2020 at 5:42 PM

```
<?PHP
function return_output($file){
    ob_start();
    include $file;
    return ob_get_clean();
}
$content = return_output('some/file.php')
