What is the equivalent of file_get_contents ($ url) in JavaScript or TypeScript?

Article Number: 54 | Rating: Unrated | Last Updated: Sun, Oct 18, 2020 at 9:13 PM

Use Ajax

```
$.ajax({
   type: "GET",
   url: "http://www.flalottery.com/exptkt/ff.html"
}).done(function(data){
   console.log(data);
});
```

Or use a simple get request

```
$.get("http://www.flalottery.com/exptkt/ff.html", function(data) {
   console.log(data);
});
```

Or use XHR

```
var xhr = new XMLHttpRequest();
xhr.open("GET", "http://www.flalottery.com/exptkt/ff.html", true);
xhr.onload = function () {
   console.log(xhr.responseText);
};
xhr.send();
